

Seller Interface:

1. Registration and Profile Setup:

- Sellers register on the platform, providing details about their expertise, specialties, and previous work.
- A thorough verification process ensures the quality and authenticity of sellers.

2. Design Requests and T2I Technology:

- Sellers receive design requests from users who are looking for customized products.
- The app utilizes text-to-image (T2I) technology, helping sellers interpret images and inspirations submitted by users.

3. Real-Time Interaction with Users:

- Sellers engage in real-time conversations with users through chat or video calls.
- Discussions include customization options, design details, and any necessary clarifications.

4. Design Approval Process:

- Sellers share design drafts with users for approval.
- Iterations and adjustments are made based on user feedback to ensure the final design meets the user's vision.

5. Order Processing and Production:

- Once the design is approved, sellers proceed with the production process.
- Sellers update users on the production status, providing estimated completion times.

6. Coordinating Delivery:

- Sellers coordinate with reliable delivery services for shipping the customized products.
- Users receive tracking information, allowing them to monitor the progress of their orders.

7. Secure Transactions:

- Sellers receive secure payments through the app.
- The app handles transactions seamlessly, deducting any platform fees or commissions.

8. User Feedback and Ratings:

- Sellers receive feedback and ratings from users upon order completion.
- Positive feedback contributes to the seller's reputation on the platform.

Functionality of the App for Sellers:

1. Profile Management:

- Sellers can manage their profiles, including updating information and showcasing their portfolio.
- A comprehensive profile helps attract users looking for specific customization expertise.

2. Design Studio Tools:

- Access to a suite of design tools to bring user ideas to life.
- Sellers can use these tools to enhance their creativity and offer diverse customization options.

3. Order Management Dashboard:

- A centralized dashboard for sellers to manage incoming orders.
- Real-time updates on order statuses, helping sellers stay organized and efficient.

4. Transparent Transaction History:

- Access to a transaction history that provides a transparent breakdown of earnings.
- Sellers can review and track their financial performance on the platform.

5. Community Interaction:

- Participate in the community by sharing insights, tips, and engaging with users.
- Collaborate with fellow sellers and contribute to a supportive and creative environment.

Benefits for Sellers:

Expand Client Base:

- Gain exposure to a wider audience and expand your client base by showcasing your expertise on the platform.

Monetize Creativity:

- Turn your creative skills into a source of income by offering personalized designs and products to users.

Real-Time Collaboration:

- Engage in real-time collaboration with users, ensuring clear communication and alignment on design specifications.

Secure Transactions:

- Conduct secure transactions within the app, with transparent details on earnings and platform fees.

Build Reputation:

- Accumulate positive feedback and ratings to build a strong reputation within the community.

Access to Design Tools:

- Utilize a range of design tools provided by the app to enhance creativity and offer diverse customization options.

Centralized Order Management:

- Efficiently manage orders through a centralized dashboard, ensuring a streamlined and organized workflow.

Community Recognition:

- Gain recognition within the community for your creative contributions, fostering a supportive and collaborative environment.
